SECTION 2.0 RISK ASSESSMENT

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
2.1	<u>For facilities within the company's control:</u> Do they conduct a self-assessment of security practices, procedures and policies according to risk?	Satisfactory	MUST	Yes facility conducts risk assessment once in a year according to policies & procedures	
2.2	<u>For facilities NOT within the company's control:</u> Do they conduct a security-based risk assessments of their business partners and other facilities in their supply chain?	Satisfactory	MUST	Facility covers all their business partners into risk assessment.	

2.2.1	If yes, does this assessment include consideration of relevant factors to supply chain security, such as volume, country of origin, routing, terrorist threat, etc.?	Satisfactory	Should	Yes, this assessment includes all the relevant factors which are mentioned.	
2.2.2	If yes, does the company maintain a list of all business partners by name, type of service provided, role in the supply chain, address of physical office location, contact information (e.g. telephone numbers, fax numbers, email), and contact name?	Satisfactory	Should	Facility do maintain a list of all business partners by name, type of service, role in supply chain, proper address of their office and contact information.	
2.2.3	If yes, does this assessment include a mapping of the movement of cargo throughout the company's supply chain, including locations where cargo is "at rest" for an extended period of time?	Satisfactory	Should	The risk assessment include contact information of the movement of cargo.	
2.3	Is the security risk assessment reviewed or updated at least annually?	Satisfactory	MUST	Yes, the risk assessment reviewed once in a year.	
2.4	Does the company have procedures that address crisis management, business continuity, security recovery plans and business resumption?	Need improvement	Should	Facility does not have any crisis management business continuity and security recovery plan in their security procedures.	

Section 2.0 Summary

Total No. of Critical Violations	0	Total No. of Not Applicable (NA)	0
Total No. of Fails Criteria	1	Section Score	85.7
Total No. of Meets Criteria	6	Section Score (%)	85.7

SECTION 3.0 BUSINESS PARTNER SECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
3.1	Does the company have a risk-based process for the selection of all business partners?	Satisfactory	MUST	Yes, the facility has risk based process for its all business partner.	
3.1.1	If yes, do contracts with business partners address compliance with C-TPAT's minimum security criteria?	Satisfactory	MUST	All the business partners comply with minimum security criteria.	
3.1.2	If yes, does the company only use CTPAT assigned highway by company or ensure that the actual entity carrying the cargo maintaining minimum security criteria?	Satisfactory	MUST	Facility is using CTPAT assigned highway carriers which meets the standard of security criteria.	
3.2	Does the company have a risk-based process for the monitoring of all business partners?	Satisfactory	MUST	Facility has a risk based process to monitor it's all business partners.	
3.2.1	If yes, does the company require business partners to complete a security questionnaire or provide evidence that their security practices meet C-TPAT's minimum security criteria?	Satisfactory	MUST	Facility develop checklist for supplier factory which ensures the cross checking system of minimum security practices.	
3.2.2	If yes, does this include timely correction of deficiencies in their business partners' security practices?	Satisfactory	MUST	When issues arise they work on the corrective action plan in a timely manner to ensure the continuous improvement.	
3.2.3	If yes, is the security assessment of the company's business partners updated on a regular basis?	Satisfactory	Should	Yearly security assessment for all the business partners covering it.	

3.2.4	If yes, does the company provide guidance or training to its business partners regarding C-TPAT's security requirements?	Need Improvement	Should	During the assessment no related training/awareness docs were found.	
3.3	Does the company have a social compliance program that prohibits the use of forced, imprisoned, indentured, or indentured child labor in the production of its products?	Satisfactory	Should	Yes, the facility has implemented social compliance program which all the mentioned points.	

Section 3.0 Summary

Total No. of Critical Violations	0	Total No. of Not Applicable (NA)	0
Total No. of Fails Criteria	1	Section Score	88.8
Total No. of Meets Criteria	8	Section Score (%)	88.8

SECTION 4.0 CYBERSECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
4.1	Does the company have comprehensive written policies or procedures covering IT protection and cybersecurity?	Satisfactory	MUST	Facility has written policies & procedures which covers IT protection & cybersecurity.	
4.1.1	If yes, are the policies and procedures reviewed, updated and endorsed by management at least once a year?	Satisfactory	MUST	All the policies & procedures reviewed, updated & endorsed by management at least once in a year.	
4.1.2	If yes, do the procedures clearly state what is considered abuse of its IT systems?	Satisfactory	MUST	During reviewing all policies & procedures it was clearly noticed that if someone has disobeyed the instruction given by IT Department then he/she has to face the consequence as per the	
4.1.3	If yes, does the company have a clear process for disciplining violators of these procedures?	Satisfactory	MUST	Yes, facility has clear process for disciplining violators of related procedures.	
4.1.4	If yes, does the company have processes to identify, prevent and address the loss of data in the event of attacks via social engineering (such as phishing)?	Satisfactory	MUST	Facility has internal process to identify, prevent & address the loss of data against attacks via social engineering.	
4.1.5	If yes, does the company only allow remote access to its IT systems through secure technologies, such as virtual private networks (VPNs)?	Satisfactory	MUST	Currently facility's IT department using anydesk to establish new access through secure technologies but anydesk sometimes occur problematic situation.	
4.1.6	If yes, do all employee personal devices used for company business adhere to the company's cybersecurity policies and procedures?	Satisfactory	MUST	Yes, All employees are aware & do strictly follow the company's policies and procedures.	
4.1.7	If yes, does the company utilize an effective employee ID system to control access only to IT systems necessary for the performance of their duties?	Satisfactory	MUST	Yes, facility's IT Department provides individual ID system to have the access on their provided device.	
4.1.8	If yes, are employees assigned individual accounts that require a periodic change of password?	Need Improvement	MUST	All employees assigned individual account require periodic change of password (30 days)	
4.1.9	If yes, does the company's IT systems include automatic time-outs of users and the disabling of accounts after a number of failed log-in attempts?	Need Improvement	Should	All accounts associated with automatic time - outs if idle for more than 5 minutes & account will be automatically disabled after entering 3 times wrong password.	
4.1.10	If yes, does the company have a policy to share cybersecurity threats with governments and business partners?	Satisfactory	Should	Facility has a written cyber security policy but did not share it to all business partners.	
4.2	Does the company use software to conduct business or manage data?	Need Improvement	MUST	Facility use no software to manage data.	

4.2.1	If yes, is the software capable of identifying and preventing unauthorized access?	Need Improvement	MUST	N/A	
4.2.2	If yes, does the company have sufficient software solutions to protect their IT systems from malware (viruses, spyware, worms, Trojans, etc.) and external intrusions?	Satisfactory	MUST	Facility has licensed anti-virus which protect IT system from malware and external intrusions.	
4.2.3	If yes, does the company's software receive automatic security updates?	Satisfactory	MUST	Yes, company's software receive automatic security updates.	
4.2.4	If yes, does the company prevent the use of counterfeit or improperly licensed technology or software?	Need Improvement	Should	Facility does not restrict the use of different software which are improperly licensed.	
4.2.5	If yes, are all sensitive and confidential data stored in an encrypted format and backed up at least once a week?	Satisfactory	Should	All the sensitive and confidential data stored in one drive & the backup system is automatic whenever we put something in shared drive it synchronise the file automatically within a	
4.3	Does the company conduct business using hardware or store data on physical electronic media?	Satisfactory	MUST	Yes, the facility conduct business using hardware or store data on physical electronic media.	
4.3.1	If yes, does the company regularly test the security of their IT infrastructure and, if vulnerabilities are found, implement corrective actions promptly?	Satisfactory	MUST	Facility conduct test of their IT infrastructure and take corrective action when vulnerabilities are found at a regular basis.	
4.3.2	If yes, does the company ensure regular inventories are done for all media, hardware and/or other IT equipment and follow appropriate industry guidelines for media sanitization upon disposal?	Satisfactory	MUST	Facility does maintain inventory for the term of media sanitization upon disposal.	

Section 4.0 Summary

Total No. of Fails Criteria	2	Section Score	75
Total No. of Meets Criteria	15	Section Score (%)	75

SECTION 5.0 CONVEYANCE AND INSTRUMENTS OF INTERNATIONAL TRAFFIC (IIT) SECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
5.1	Does the company have written procedures covering security inspections of containers, cargo handling and storage areas?	Satisfactory	MUST	Facility has a written policies & procedures for covering security inspections of containers, cargo handling and storage areas.	
5.1.1	If yes, does this include appropriate seven point inspections of all empty containers, unit load devices	Satisfactory	MUST	Appropriate 7 point inspection is included in this policy	
5.1.2	If yes, does this include inspection of all external hardware to ensure that it can withstand attempts to remove it and detect any tampering?	Satisfactory	MUST	It also covers inspection of all external hardware in order to detect and remove any tampering.	
5.1.3	If yes, are there procedures for the cleaning of containers or areas found to have pest contamination?	Satisfactory	MUST	Facility has procedure for cleaning of containers areas to conduct scheduled pest control	
5.1.4	If yes, are all the points of the inspection documented on a checklist?	Satisfactory	Should	All the points of the inspection are documented.	
5.1.5	If yes, are these inspections done in a secured area and, if available, monitored via CCTV?	Satisfactory	Should	Inspection area is being monitored by CCTV.	

5.2	Is the integrity of containers and other IIT maintained during loading/stuffing/packing using clearly written procedures?	Satisfactory	Should	Facility maintain integrity containers and other IIT while loading, packing & stuffing as per written policy.	
5.3	Are random searches conducted by management on containers and other IIT post-inspection?	Satisfactory	Should	Facility conducts random search covering containers and other IIT post-inspection.	
5.4	Does the company have secure areas where they handle their cargo?	Satisfactory	MUST	Facility has allocated secured area for cargo handling.	
5.4.1	If yes, does this include a secure storage area for empty and full containers and other IIT to prevent unauthorized access?	Satisfactory	MUST	The cargo area is restricted for unauthorized access.	
5.4.2	If yes, are loading docks for trucks and pick-ups/deliveries separate from all other vehicles and traffic?	Satisfactory	Should	Yes, the loading area for trucks/pick-ups are separated from all other vehicles and traffics.	
5.4.3	If yes, is there a secured area for truck and pick-up/delivery drivers to wait while cargo is loaded and unloaded?	Satisfactory	Should	Facility has secured area for trucks/pick-ups for waiting while loading/unloading point is engaged by cargo.	
5.5	Does the company have written procedures for reporting incidents, such as thefts, tampering and unmanifested items, to affected business partners and law enforcement agencies?	Satisfactory	MUST	Facility has written procedures for reporting incident regarding thefts, tampering & unmanifested items.	
5.6	Are there procedures to track the movement of all cargo during transit via their transportation providers?	Satisfactory	Should	Facility has written procedures to track the movement of all cargo during transit.	
5.7	Does the company have access to their transportation providers GPS monitoring system so that they can track their shipments?	Need Improvement	Should	Facility does not provide GPS tracker to their transport but they do track their vehicles/cargo through phone calls communication during the shipment.	

Section 5.0 Summary

Total No. of Critical Violations	0	Total No. of Not Applicable (NA)	0
Total No. of Fails Criteria	1	Section Score	93.34

SECTION 6.0 SEAL SECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
6.1	Does the company have written procedures to control, record and affix ISO 17712 compliant seals on all containers and IIT?	Satisfactory	MUST	Facility has written procedures to control ISO 17712 compliant seals on all containers and IIT	
6.1.1	If yes, are these procedures maintained and accessible at the local, operating level?	Satisfactory	MUST	Yes, all these procedures maintained and accessible at the local operating level.	
6.1.2	If yes, are these procedures reviewed and updated at least once a year?	Satisfactory	MUST	All procedures are reviewed and updated (if needed) once in a year.	
6.1.3	If yes, do they document that all seals meet or exceed the current ISO 17712 standard?	Satisfactory	MUST	All documents & seals meet the current ISO 17712 standard.	
6.1.4	If yes, are all containers and IIT secured with a ISO 17712 compliant seal immediately after loading/stuffing/packing?	Satisfactory	MUST	Once container has been loaded then it is sealed by ISO 17712 compliant seal.	
6.1.5	If yes, are all seals verified using the VVTT process?	Satisfactory	MUST	All seals are verified using the VVTT (View, verify, tug & twist) process.	

6.2	Are periodic audits of seals conducted that include an inventory of stored seals, reconciliation against seal documentation, and the periodic verification of seal numbers on containers or IIT?	Satisfactory	MUST	Facility's internal security internal audit covers it but it happens once in a year not periodic.

SECTION 7.0 PROCEDURAL SECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
7.1	If cargo is held at the facility for an extended period of time, such as overnight, is it stored in a secure area?	Satisfactory	MUST	Facility has secured cargo parking area so when it is required for staying overnight then cargo has been parked to those specific parking area.	
7.2	Does the company ensure that cargo staging and storage areas are regularly inspected for pest contamination?	Satisfactory	MUST	Facility conduct pest control by third party as monthly basis which covers all the areas of facility's premises.	
7.3	Does the company keep international cargo separate from domestic cargo?	Need Improvement	Should	NO, Facility has common cargo parking area both for national and international.	
7.4	Does the company keep hazardous or dangerous cargo separate from other cargo?	Need Improvement	Should	Company does not keep hazardous and non hazardous cargo in different place.	
7.5	Does the facility have a designated employee, preferably a security officer, to supervise the loading/stuffing/packing of cargo into containers and IIT?	Satisfactory	Should	Yes, facility has assigned supervisor to supervise the loading of cargo.	
7.6	Does the company require digital images to be taken of the properly installed seals during loading/stuffing/packing to be compared with the images taken at the destination?	Satisfactory	Should	yes, company's assigned responsible security personnel takes images during cargo loading activities.	
7.7	Are all cargo properly marked, counted, weighed, documented and reported on the manifests and bills of lading (BOL)?	Satisfactory	MUST	Yes, all cargo properly marked and reported on bill of lading (BOL).	
7.8	Is all information used in the clearing of cargo legible, complete, accurate, protected against exchange, loss, or the introduction of erroneous information and reported on time?	Satisfactory	MUST	All the above mentioned informations are reflected on time.	
7.9	Does the company have procedures to verify both arriving and departing cargo against manifests, purchase orders, or other shipment documentation?	Satisfactory	MUST	Company has written procedures to verify both arriving and departure cargo.	
7.9.1	If yes, do these procedures cover the process for resolving any cargo discrepancies (shortages, overages, etc.) found?	Satisfactory	MUST	Facility's security procedures cover the process for resolving any cargo discrepancies.	
7.1	Are seal numbers electronically printed on the BOL or other shipping documents and transmitted to the receiver of the delivery prior to departure?	Satisfactory	Should	Seal numbers are electronically printed on the BOL.	

7.11	If paper documents are used for recording cargo or shipment information, are these documents properly secured?	Satisfactory	Should	Facility's recorded docs for cargo or shipment informations are fully secured.	
7.12	Does the company have written procedures for challenging unauthorized or unidentified persons attempting to gain access to the facility?	Satisfactory	MUST	facility has written pocedures for challenging unauthorized or unidentified persons attempting to gain access to the facility.	
7.13	Are all cargo and shipping documentation reviewed by personnel appropriately training on how to identify suspicious cargo shipments?	Satisfactory	MUST	Facility's HR,Compliance & Security department combindly provide security awareness training which cover that how to identify suspicious cargo shipment.	
7.14	Does the company have procedures for a prompt internal investigation of any security-related incident.	Satisfactory	MUST	Facility has procedures for internal investigation of any security related incident.	
7.15	Does the company have written procedures for reporting security incidents to relevant customs or law enforcement agencies, depending on the severity of incident?	Satisfactory	MUST	facility's security procedure has written guideline about how to report security incidents to the relevant customers or law enforcement agencies.	
7.15.1	If yes, does the company have documented procedures for anonymously reporting security incidents to relevant parties?	Satisfactory	Should	Company has written procedure for anonymously reporting regarding security incidents.	
7.15.2	If yes, is there an incentive scheme which encourages staff to report security incidents?	Satisfactory	Should	There is a fixed amount of cash incentive scheme (500 Tk) has been developed which encourages staff to report security incidents.	

Section 7.0 Summary

Total No. of Fails Criteria	2	Section Score	88.8
Total No. of Meets Criteria	18	Section Score (%)	88.8

SECTION 8.0 PHYSICAL SECURITY

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
8.1	Are facilities designed and constructed with materials appropriate to prevent unauthorized access?	Satisfactory	MUST	Facility has constructed perimeter boundaries which is almost 11 feet height which is more than enough to prevent unauthorized access.	
8.2	Does the facility have perimeter fencing or walls on all sides of a height of 6 ft (1.8 m) and, where appropriate, interior fencing or walls to segregate cargo such as domestic, international, high value, and/or hazardous materials?	Satisfactory	Should	Facility has permeter fencing which covers the standard of C-TPAT.	
8.3	Does the facility have functional locking devices for all internal and external doors, windows, gates and fences, where appropriate to prevent unauthorized access?	Satisfactory	MUST	Yes, facility has functional locking devices for those mentioned areas.	
8.4	Does the facility have written procedures to control the issuance of keys, and are keys recovered and/or locks changed when employees who have them change positions within or leave the company?	Satisfactory	MUST	facility has written procedures to control the issuance of keys & lost key inventories.	

8.5	Does the facility have internal and external lighting in all required areas (e.g. entrances and exits, cargo handling and storage areas, the factory perimeter, parking areas, etc.)?	Satisfactory	MUST	Facility has sufficient lighting arrangement which covers entrance & exit, cargo handling and storage areas.	
8.6	Does the facility monitor all external access points either using manned positions or technology?	Satisfactory	MUST	Yes the facility do monitor all external access points.	
8.7	Is parking at the facility authorized using a decal system or using passes issued from a security gate?	Satisfactory	Should	Facility's security personnel provide issued pass from a security gate to all transport in order to park in factory's allocated parking area.	
8.8	Is parking for private vehicles (employees, visitors, vendors, contractors, etc.) clearly separated from cargo staging areas and loading docks?	Satisfactory	Should	Parking area for visitors and employee are separated from cargo staging areas and loading docks.	
8.9	Does the facility have documented policies for the use, maintenance and protection of security technology (e.g. building, fencing, gates, lights, alarm system and CCTV) including regular inspections?	Satisfactory	MUST	Facility conduct regular inspection which cover all C-TPAT areas as per policy	
8.1	Is access to all security technology infrastructure physically restricted?	Satisfactory	MUST	All security technology infrastructures are physically restricted.	
8.11	Are security technologies used to prevent unauthorized access to sensitive areas?	Need Improvement	Should	Facility has planned installed manual motion sensor detector alarm system which will cover finished goods section, packing area & loading unloading area.	
8.12	Does the facility have a security alarm system, which is appropriately managed when employees leave the company?	Need Improvement	Should	Facility's security alarm is maintained in a manned when the factory remain close after daily working hour.	
8.13	Does the company only use licensed or certified resources when designing or installing security technology?	Satisfactory	Should	Yes, facility do check the license and certification of the products/equipments before purchasing them.	
8.14	In event of power loss, are all critical security technology systems connected to alternate power sources?	Satisfactory	Should	Yes if power failure then all the CCTV cameras & other security devices have alternative backup system (IPS/Generator)	
8.15	Are cameras systems (e.g. CCTV) used?	Satisfactory	Should	Facility has currently installed almost 40 security cameras to cover all C-TPAT areas.	
8.15.1	If yes, are these camera systems used to monitor the facility's premises including the key areas related to cargo and container security?	Satisfactory	MUST	These camera system cover almost entire premises including the all key areas of C-TPAT.	
8.15.2	If yes, are these camera systems set to record on a 24 hour, 7 days a week basis and at the highest picture quality setting reasonably available?	Satisfactory	MUST	All camera system set to record on a 24/7 with maintaining higher resolution of video/image quality.	
8.15.3	If yes, are periodic reviews of the camera footage conducted by relevant personnel and documented in writing including any corrective actions that were taken?	Satisfactory	MUST	Facility has assigned personnel who is responsible to monitor/review CCTV backup & if any issue occur then all issues with corrective action plan are being documented in a proper manner.	
8.15.4	If yes, do these camera systems have an alarm or other notification feature that signals when the camera is not operating properly or not recording?	Need Improvement	Should	No, facility's CCTV cameras do not have any alarm system when its not properly functional.	
8.15.5	If yes, is camera footage of all key import and export processes maintained for a sufficient amount of time to allow for investigations of monitored shipments?	Satisfactory	Should	If needed factory assigned person get the access of CCTV footage for investigation purposes or routine check.

SECTION 9.0 PHYSICAL ACCESS CONTROLS

SL No	Security Measures	Compliance Level	Criteria Type	Auditor Remarks	Comments on N/A & Others
9.1	Does the company have a documented procedure defining access controls for employees and drivers?	Satisfactory	MUST	Facility has a documented procedure defining access controls for employees and drivers.	
9.1.1	If yes, are all employees required to present identification upon entering the facility?	Satisfactory	MUST	Yes, all employees required to present identification when entering into the facility.	
9.1.2	If yes, are drivers required to present photo identification prior to cargo being received or released to/from their custody?	Satisfactory	MUST	All drivers required to present photo identification prior to cargo being received or released.	
9.1.3	If yes, does the company maintain a cargo pickup log for all registered drivers?	Satisfactory	MUST	facility maintain cargo pickup log for all registered drivers	
9.1.4	If yes, are deliveries and pickups allowed by appointment only?	Satisfactory	Should	Yes	
9.1.5	If yes, do carriers notify the company before drivers arrive at the facility with relevant details of the pickup?	Satisfactory	Should	Carriers always notify company before drive arrives at the factory	
9.1.6	If yes, is pickup and delivery of cargo limited only to monitored areas of the facility?	Satisfactory	Should	Yes	
9.1.7	If yes, are arriving packages and mail periodically screened for dangerous materials or contraband before being admitted?	Satisfactory	Should	All arriving packages are periodically screened before entering the factory.	
9.2	Does the company have a documented procedure defining access controls for visitors?	Satisfactory	MUST	Facility has a written documented procedure which defines access control for visitors.	
9.2.1	If yes, are all visitors required to present a valid photo ID for positive identification before being allowed access to the facility?	Satisfactory	MUST	when visitors are at entrance security point they need to maintain a procedure by giving information related to purpose of visit and whom to visit. After giving such kind of information they do signature on the register book and security personnel must provide a visitor access card to them	
9.2.2	If yes, are all visitors issued temporary ID's?	Satisfactory	MUST	Yes, all visitors are issued by visitors ID's	
9.2.3	If yes, does the company maintain a log of all visitors entering the facility?	Satisfactory	MUST	Facility maintains a log of all visitors.	
9.2.4	If yes, are employee escorts required for all visitors while on the premises?	Satisfactory	MUST	Facility's security personnel escort all visitors after entering into the premises if they are new for the factory.	
9.2.5	If yes, are visitors required to have an appointment prior to being granted admission to the facility?	Satisfactory	Should	All the visitors required to have an appointment prior to enter the factory	
9.2.6	If yes, are all visitor's packages screened prior to being granted admission to the facility?	Satisfactory	Should	All packages throughly checked by security guards before entering into the factory premises.	
9.3	Does the facility employ security guards?	Satisfactory	Should	Yes the facility has own security guard	
9.3.1	If yes, are there written work instructions for the securityguards that management periodically checks for compliance and appropriateness?	Satisfactory	MUST	facility has written instruction for their own security guards & management also check all compliance issues.
